

should be assumed by the expanded interconnection customer without relying on the LEC to be a guarantor that the customer will not be harmed by an accident.

An interconnection customer that is a cause of a catastrophic loss should not receive free relocation or rearrangement service. Indeed, it should pay for all the services it uses and for any damage to LEC and others' property.

2) United and Central do not believe that the catastrophic loss of collocation space in one office should trigger the ability of an interconnector to demand expanded interconnection space in an alternative office within seven days. First of all, space in an alternative office may not be available. In addition, even if alternative office space is available, seven days' preparation time may not allow sufficient time for proper engineering or construction.

United and Central do not agree that LECs should necessarily be liable for repairs, or that these repairs should proceed at the same pace as other repairs. Both United and Central allow collocation space cage construction by interconnection customers or third party contractors. If a cage not constructed by the LEC is damaged, the LEC should not automatically be responsible for repairs. This is especially true if the LEC is not at fault in the accident.

Further, United and Central do not believe that collocation space should necessarily be repaired in the same sequence as other repairs to the facility. Essential public safety, national security or other circuits provided to the government must be repaired on a first priority basis. Therefore, it is appropriate that repairs may be required in certain sections of the LEC premises before repairs to collocation spaces can be undertaken.

United and Central oppose free rearrangements and relocations for interconnection customers. Prudent business practices mandate that businesses properly protect themselves against loss through the purchase of insurance. In the case of a catastrophic loss that requires expanded interconnector rearrangements or relocation, the risk of loss, in the absence of gross negligence by the LEC, should be born by the customer. The customer's insurance should pay for rearrangement or relocation costs.

J. Are the LECs' relocation provisions reasonable? (Pars. 55-57.)

(a) The United and Central tariffs do not stipulate a specific advance notice period to the interconnector when the LEC intends to relocate the interconnector's space or equipment, however, the general regulations associated with the provision of all access services provide that the LEC will work cooperatively

with the interconnector to determine reasonable notification requirements. In addition, the tariff provides that the LEC is responsible for the costs associated with the removal, transport and reinstallation of the interconnectors' equipment.

(b) The United and Central provision allowing the LEC to move, either within a wire center or to another wire center, an interconnectors' space or equipment is designed to allow LECs to operate in the most cost efficient manner and to accommodate future expansion needs.

(c) The United and Central procedures provide that in situations where the interconnector requests that its collocation space be moved within a serving wire center or to another serving wire center, the interconnector is responsible for the costs associated with the preparation of the new collocated space at the new location and for the removal, transport and reinstallation of its equipment. Alternatively, in situations where the LEC determines that it is necessary for the interconnector to move its collocated space, the LEC is responsible for the costs associated with the removal, transport and reinstallation of the interconnectors equipment.

K. Are the LECs' insurance provisions reasonable? (Pars. 58-63.)

(a) United and Central require \$1 million of primary auto and general liability, \$500,000 of employers' liability and \$5 million of umbrella/excess liability.

Although the probability of a loss under the auto coverage is considered low, exposure to the LEC exists from operation of the interconnector's vehicles on or near the LEC's premises to perform work on the LEC premises as contemplated by the Special Access Expanded Interconnection tariff.

Because the value of LEC equipment subject to damage from the interconnector's presence in the collocation site may easily exceed multiples of the insurance limit required, a total of \$6 million of liability insurance is not considered excessive. Most interconnectors are expected to have this limit in place, as a prudent business practice, and the requirement should impose no burden. Some interconnectors with less than these insurance limits may not have the financial resources to honor the tariff indemnity and defense commitment and may unduly expose the LEC to repair its own equipment when damaged by the interconnector's negligence or equipment. This would result in a burden on the general ratepayer rather than upon the interconnector.

(b) It is recognized that some telecommunications companies are financially capable of self-insuring much or all of their liability exposures, while others are not. It would be appropriate, therefore, to allow financially reputable companies to self insure all or part of their insurance obligation if, in the reasonable opinion of the Company, the interconnector is capable of absorbing the amount of the stated self-insured limit, including defense costs, without materially affecting its financial condition.

(c) Not applicable to United or Central.

(d) While United and Central do not have a written requirement on when insurance should be effective, it is expected that such insurance will be effective before any non-LEC workers or equipment are allowed access to the LEC premises for the purpose of physical collocation space construction activities or interconnector owned equipment installation.

L. Are the LEC's liability provisions reasonable? (Pars. 64-66.)

(a) United and Central do not limit their liability for willful misconduct. Otherwise, the General Regulations in their respective Access Tariffs limit their liability to the

proportionate charge for the service for the period during which the service was affected. Further, in the event of destruction of the interconnectors equipment caused by the sole negligence of United or Central, liability is not disclaimed. United and Central believe this limitation of liability, which has existed historically, continues to be appropriate. Rather than build insurance premiums into general rates for customers, this limitation allows for limiting liability to customers and results in lower overall rates.

Interconnectors are required to indemnify the LEC for any damage or liability caused by or contributed to by acts or omissions of the interconnector or agents of the interconnector. This simply relieves the LEC of financial responsibility for acts of the interconnector.

The policy whereby a tenant bears a greater responsibility than an owner for liabilities created out of the occupancy, including joint negligence, is not only a common standard business practice, it is considered reasonable. The owner is providing the facility and services to accommodate the occupancy whereas the tenant is merely a user of the facility and service. A tenant, having less financial exposure than the owner for damage to the premises, normally does not have the same incentive to exercise the same degree of care as the owner unless he had a

greater responsibility for resultant liability. United and Central's position stated in the indemnification provision is considered well within reasonable business practice.

(b) Not applicable to United or Central.

M. Are the LECs' provisions regarding whether to bill from their state or interstate expanded interconnection tariffs reasonable?
(Pars. 67-68.)

(a) United and Central believe that use of the 10 percent interstate traffic rule, which makes the special access service jurisdictionally interstate, is appropriate. All special access interconnection elements should be treated as jurisdictionally interstate when at least 10 percent of the traffic is interstate in nature.

This matter has already been considered by the Joint Board and received comments from concerned parties. It should not be revisited in this proceeding.

N. Are the LECs' provisions regarding letters of agency reasonable? (Pars. 64-72.)

(a) The United and Central SAEI tariffs do not prohibit the use of letters of agency (LOAs) by interconnectors or their customers. An LOA process is currently utilized in the provision of certain access services, and the United and Central companies believe that the LOA process can reasonably be extended to SAEI arrangements.

(b) The United and Central companies propose that it is not necessary for LECs to state in their tariffs that they will accept an order for end-to-end service placed by an interconnector's customer using an LOA from the interconnector. Since the LOA process is currently utilized for certain access services and is not specifically addressed in LEC tariffs, the United and Central companies believe it is unnecessary to place requirements for LOAs associated with SAEI in the tariff.

(c) The United and Central companies believe that it is unnecessary for LECs to state in their tariffs that they will bill charges for the special access cross-connect rate elements and subtending end link services to third parties specified by the customers when ordering SAEI. The LOA process which is currently utilized is sufficient to accommodate this requirement.

O. Are the LECs' provisions regarding inspections of interconnector spaces and facilities reasonable? (Pars. 73-77.)

(a) The United companies SAEI tariffs do not include explicit requirements for the inspection of an interconnector's space. Provisions included in the General Regulations section of United's tariff require adherence to Telephone Company standards and Commission regulations.

The Central companies' SAEI tariff includes provisions for periodic inspection of interconnector facilities located on Telephone Company premises. These inspection requirements are reasonable and allow the LEC to detect problems that could impair service to other customers or that could damage critical telecommunications facilities.

Neither United nor Central specify that a charge will be assessed to an interconnector for such inspections.

(b) Not applicable to United or Central.

P. Should LECs be permitted to include provisions regarding the payment of taxes and similar assessments by interconnectors?

(Par. 78.)

(a) Not applicable to United or Central.

CONCLUSION

The United Telephone and Central Telephone companies have fully supported their SAEI tariffs, both in the original Description and Justification and through additional material provided in this filing. Their tariffs should be approved as filed.

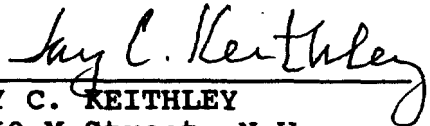

Respectfully submitted,

UNITED TELEPHONE COMPANIES

and

CENTRAL TELEPHONE COMPANIES

Notes:

- (1) The Termination Equipment Function includes all equipment in or adjacent to the interconnector's space that is used for cross-connection functions, except the cross-connection itself, e.g., POT frames, DSX boards, as well as equipment bays and other equipment installed by the LEC in the interconnector's space.
- (2) Row 54: Unit of measurement is the unit on which the rate is being assessed, e.g., per POT frame, per 100 square foot arrangement.
